- Optic nerve atrophy
- Oral cancer – only a specific type is permitted
- Oral mucositis
- Retinal detachment – treatment (topic permitted only for OP)
- Salivary duct stones
- Sciatica

- Soft tissue sarcomas
- Stained/discoloured teeth
- Stuttering
- Temporomandibular joint dysfunction
- Testicular torsion
- Thrush
- Tooth decay – root canal treatment/good oral hygiene
- Tooth loss – ITI Implant System or Bicon Implant System
- Treatments using anti-fungal drugs
- Treatments using anti-viral drugs
- Treatments using blood-thinning agents
- Treatments using herbal extracts
- Treatments using specific eye drops
- Treatments using steroids
- Treatments using tranquilizers
- Treatments using vitamins
- Trench mouth
- Warts
- Widely spaced teeth
- Wrinkles – Botox or other treatments
- Xeroderma pigmentosa

### The Compare and Contrast Research Paper

- Alcohol-based mouthwashes/non-alcohol based mouthwashes
- Amalgam/white filling
- Anxiety/stress
- Anti-viral drugs/antibiotics
- Aplastic anemia/myelodysplastic syndromes
- Athlete's foot/Dhobie itch
- Bacterial gastroenteritis/trichinosis
- Blackheads/whiteheads
- Breast reconstruction with implants/natural tissue
- Brufen/Aspirin
- Boils/spots
- Complete dentures/partial dentures
- Crown/bridge
- Delayed tooth formation/absent tooth formation
- Dengue fever/typhus
- Dental luxation/tooth fracture
- Endometriosis/uterine fibroids or fallopian tube dysfunction
- Epidural and spinal anesthesia/general anesthesia
- Esophageal/laryngeal cancer
- Fistula/piles
- Gingivitis/acute gingivitis

- Herpetic stomatitis/aphtethus ulcer
- Laser dentistry/conventional dental tools
- Mild or moderate periodontitis/advanced periodontitis
- Nicotine addiction/cocaine addiction
- Oral cavity cancer/laryngeal cancer
- Orthodontics – adult/child
- Ovarian hyperstimulation syndrome/ovarian hypofunction
- Periodontitis/gingivitis
- Pigmented birthmarks/red birthmarks
- Prostate cancer/cancer of the testes
- Red or painful eye/watery eye
- Root removal – conventional/from the sinus
- Rheumatoid vasculitis/Churg-Strauss vasculitis
- Salivary gland infections/salivary gland tumors
- Scabies/lice
- Synthetic drugs/homeopathic drugs
- Teeth cleaning/deep teeth cleaning
- Tetanus/diphtheria
- Two methods of biopsy
- Two methods of removal of beauty spots/non-malignant skin growths
- Two methods of treating an enlarged prostate
- Two methods of treating excessive hair growth
- Two methods of whitening of teeth
- Two types of anaesthesia – general/partial/local
- Two types of anti-acid drugs
- Two types of anti-depressants
- Two types of anti-fungal treatments
- Two types of anti-malarial drugs
- Two types of cranial surgery – e.g. conventional/awake craniotomy
- Two types of cough medication – e.g. Vitussin/Visvex HC
- Two types of dental sedation
- Two types of implantable cardioverter defibrillators
- Two types of intestinal cancers
- Two types of laxatives
- Two types of painkillers
- Two types of palate reconstruction procedures
- Two types of pancreatic diseases
- Two types of radiation treatment
- Two types of thyroid function tests
- Two types of vaccines – dead/live
- Vernal conjunctivitis/allergic conjunctivitis
