Message from the Dean

On behalf of all the faculties and staff members, I welcome you to the Faculty of Allied Health Sciences of Kuwait University.

The Faculty was founded in 1983 and has graduated 2099 students since establishment. The Faculty is located within the Health Sciences Center of Kuwait University. Our faculty offers 5 bachelorette professional degrees in Physical Therapy, Radiological Sciences, Medical Laboratory Sciences, Health Information Administration, and Occupational Therapy, and one Master degree in Medical Laboratory Sciences.

Our mission has been to graduate skillful and committed health professionals, able to contribute effectively to health care delivery system, promote health care education, assume leadership in their specialized field, maintain the professional standards and ethics.

We are proud that our students are also well prepared in clinical and laboratory research education and in every year we celebrate student research poster day, in which students present abstracts and posters of their research activities.

Our didactic and practical education complement each other in attaining the basic clinical competencies and the utilization of advance technology whether in the laboratory or in the clinical sites.

Our educational environment encourages interdisciplinary collaborative student work, critical thinking, and self-learning. The Faculty is expected to open three more health professional programs, such as speech pathology, Audiology and Exercise Physiology Program, in 2015.

Our students have great opportunity to continue their Master and Doctorate degrees in Europe, USA, and Australia. In fact, most of our currently teaching staff were graduates from our own programs and have attained their postgraduate degrees from reputable international universities.

Every year, many external examiners visit our faculty from international universities in Europe and USA as well as from professional organizations to reflect on our teaching, clinical education, and to review program curriculums. We continue to be the main source for qualified graduates in health professions to the state of Kuwait. There is a great demand for our graduates in the healthcare delivery system in the state of Kuwait; currently the job opportunities are available in the hospital, laboratory, and clinics of Ministry of Health, Ministry of Defense, National Guard, Ministry of Interior, Ministry of Social Affairs & Labor, and Ministry of Education. We are very proud of all our graduates and their professional performances in helping their country.

Dean's Message

Prof. Saud Al Obaidi
ABOUT THE FACULTY

FACULTY OF ALLIED HEALTH SCIENCES

Undergraduate programmes in allied health sciences were first offered in Kuwait University in the School of Allied Health Sciences and Nursing, within the faculty of Medicine, in 1978. The Faculty of Allied Health Sciences and Nursing was established as an independent Faculty within the Health Sciences Centre in 1982. It changed its name to the Faculty of Allied Health Sciences in 2004 when the Nursing programme was transferred to the Public Authority for Applied Education and Training.

The programmes were established to produce locally-trained staff able to meet local needs, and to provide a more stable workforce than expatriate staff. The faculty currently offers Bachelor’s degree programmes in Health Information Administration, Medical Laboratory Sciences, Occupational Therapy, Physical Therapy and Radiologic Sciences. The Faculty plans to offer two additional programmes in Speech Therapy and Respiratory Therapy in the very near future.
Prof. Ali A. Dashti

Dear Students, Faculty Members and Colleagues,

It is indeed an honour and a great privilege for me to say a few words today on the occasion of the 6th Annual Student Research Poster Day.

It is an important day and an integral part of the academic calendar of the Faculty of Allied Health Sciences. I am pleased to state that, from my observations of the earlier Student Research Poster Day activities, it is a day that the students look forward to with a great deal of enthusiasm and the initiative taken by the students in preparation and presentation of their research work is remarkable. It provides them with a medium to express their thoughts, view and ideas.

As observed in the past, the success of our Annual student Research Poster Day is not due to an individual effort by the students, but it is the teamwork of the students along with their advisors. I take this opportunity to congratulate both, the students and their advisors for a job well done.

May I also take this opportunity, as Vice Dean of the Faculty to conclude by wishing each and every student success in their professional careers, especially those who will be graduating this academic year. On behalf of my colleagues in the Faculty, I would like to wish each and every student all the very best in serving our community in the State of Kuwait.

Prof. Chacko Mathew

Welcome to the 6th Student Research Day of the Faculty of Allied Health Sciences of the Kuwait University. Research is the driving force of any academic institution. The Student Research Day is a day for the students and faculty to meet and discuss the outcome of the various research projects undertaken during the year. I am privileged to state that our students have embraced a wide range of research activities and the success of the past five years reflects the intensive nature of the research carried out by the undergraduates and graduate students at the Faculty of Allied Health Sciences, and the commitment and support of the many Faculty members as well as the Medical Laboratory Scientists who mentor and supervise student researchers.

The major mission of the Student Research Day is to recognize and showcase the wide range of research. Furthermore, it provides an opportunity for the students and their supervisors to share ideas and knowledge as well as to network and connect with other research-oriented students and faculty in Kuwait University, which may lead to future collaboration.

As evident from the previous student research days, the research activities displayed by the students invariably mirror the Faculty research itself in the breadth of topics covered - spanning huge areas of basic, translational, and clinical research conducted in the Faculty of Allied Health Sciences.

My sincere wish is that the events of the Student Research Day in the Faculty of Allied Health Sciences should promote intellectual curiosity, appreciation of scholarly inquiry, flexibility, openness to new ideas and discoveries, and the ability to work both independently and collaboratively. I hope that this year, too, the Faculty of Allied Health Sciences Student Research Day will be successful in providing an ideal platform to foster the development of young researchers who will aid in the advancement of scientific medicine for years to come.

Congratulations to all the participants of the 6th Faculty of Allied Health Sciences SRD, and my sincere thanks to the Dean, Vice Dean for Academic Affairs and Postgraduate Studies, Members of the 6th Faculty of Allied Health Sciences Student Research Day Committee, Faculty members and Support staff at the Faculty of Allied Health Sciences and the Kuwait University administration who have made this year’s event possible.
FACULTY OF ALLIED HEALTH SCIENCES

Mission & objectives

Mission

The mission of the Faculty of Allied Health Sciences is to educate and train knowledgeable, skillful and committed allied health professionals whom shall assume responsibilities as members of the health care team in the Kuwaiti health care delivery system. In particular, the aim is to graduate allied health professionals whom have the requisite entry level competencies, meet the professional standards and whom shall adhere to professional ethics in their professions. The Faculty also aims to contribute to the development of the profession and allied health services in Kuwait, both in the Kuwait health care delivery system and in private hospitals, by providing consultancy and other health services.

Objectives

The key objectives, therefore, are:

- To develop, monitor, evaluate, review and maintain a curriculum for the Bachelor's degree programmes that reflects the state-of-art in the professions and prepares students for work as a member of the health care delivery team.

- To liaise with staff in the Ministry of Health in order to provide the optimal environment in the Ministry hospitals and clinics for baccalaureate students to achieve the entry level competencies, through hospital rotations, in their respective profession.

- To develop, monitor, evaluate, and maintain postgraduate programmes (Diploma and Masters) that impart and enhance allied health professionals' knowledge and capabilities in their professional area.

- To develop and provide continuing education/continuing professional development (postgraduate programmes, short courses, lectures, workshops and seminars) for Ministry of health staff that meet the changing health care needs of Kuwait, and that keep them abreast of the state-of-the-art in their professions.

- To recruit well qualified and experienced teaching and support staff who will act as role models for students and who keep themselves abreast with scientific advances in the field and apply the state-of-the-art in all endeavours: teaching, curriculum development and assessment, research, clinical supervision and community service.

- To provide baccalaureate student with the necessary support and guidance in terms of counselling, and feedback on academic and clinical performance.

- To provide an optimal learning environment in terms of classrooms, laboratories, learning resources and modalities of teaching and learning.

- To provide consultancy services to hospitals and clinics in the public sector health care delivery system and in the private sector.

ADMISSION REGULATIONS

1. The secondary school percentage (Science Major) should be no less than 75% (or its equivalent).

2. Priority of admission is given to applicants who have the highest Equivalent Grade-point Average calculated by the Secondary School percentage and the results of aptitude tests as follows:
   - 70% for the Secondary School percentage
   - 15% for the result of the English Language Test
   - 7.5% for the result of the Mathematics Test
   - 7.5% for the result of the Chemistry Test

Candidates shall be admitted to the Faculty according to the Kuwait University and Faculty admission criteria in force at the time.

Students will be admitted to the academic departments in the Faculty second year depending on their grade point average in their first year of study, the availability of places and other criteria which may be determined for specific departments.

Provided they have not registered for another university programme, these candidates shall be school leavers of one of the two academic years prior to the academic year that they join Kuwait University.

Study load

The academic department offering a course specifies the number of credit hours (C.H.) it is worth. The credit hour rating of a course is normally based upon one hour of theoretical study (i.e. a lecture) or at least two hours of applied study (e.g. a laboratory session) being equal to one credit hour. All courses must extend through a complete semester.

The normal study load in a regular semester is 15-19 C.H. The maximum study load is 21 C.H., and 7 C.H. for the summer semester.

With the approval of his/her advisor, Chairman and the Dean, a student who has passed at least 30 credits may register for 21 C.H. if he/she has a grade point average (G.P.A.) 3 on the 4 point scale (see section 3 below).

A student in the Health Sciences Centre may register for less than 15 C.H. in a regular semester with the approval of his/her advisor and the Dean.

To meet graduation requirements, a student may register for any number of credits up to a maximum of 21 with the approval of his/her advisor and the Dean.

FACULTY OF ALLIED HEALTH SCIENCES
programs:

The Bachelor’s degree programmes in Health Information Administration, Medical Laboratory Sciences, Physical Therapy and Radiologic Sciences take a minimum of four years to complete. The Occupational Therapy programme is four and a half years.

The first two years are devoted to basic sciences and English and some introductory courses in the chosen profession. Years Three and Four are dedicated to professional studies, and include, didactic and laboratory-based classes taught in the departments in conjunction with clinical experiences provided by Ministry of Health hospitals.

All Year One students take a common Year One programme of English, basic science courses and an Introduction to the Professions course, designed to assist them in making an informed choice about which department they would like to join in Year Two. The allocation of students to departments is made at the end of Year One based on their preference, academic performance in the first year and the availability of places in each department.
The degree offered by the Faculty are:

1) Health Information Administration (B.Sc)
2) Medical Laboratory Sciences (B.Sc.)
3) Occupational Therapy (B.Sc.)
4) Physical Therapy (B.Sc.)
5) Radiologic Sciences (B.Sc.)
   (i) Diagnostic Radiography
   (ii) Nuclear Medicine Technology

The programmes extend through four years, with the exception of Occupational Therapy which is four and a half years. The first two years are devoted to study of English language and basic sciences, and an introduction to medical sciences and the Faculty’s professions. The third and fourth years (and fifth year in the case of Occupational Therapy) are devoted to the professional training programmes, both theoretical and practical, and include substantial clinical experience in the hospitals of the Ministry of Health.
Health Information Administration is a profession which is at the heart of the modern health care delivery system. Without a proper medical (patient) record, there cannot be good patient care because the modern health care system relies on team effort. For communication to be effective, the record must be accurate and complete. The Health Information Administrator is a professional who functions as a member of the health care management team, and is responsible for developing information systems, collecting health care data, analyzing the information, and disseminating it to appropriate areas. Most of the health data are collected from individual patient records. The Health Information Administrator is responsible for securing, safeguarding and making the record available for such activities as current and future care of patients, physicians, and hospitals legal rights and development of comparative care statistics. The complex duties of a professional Health Information Administrator demand management skills of a high level. The graduates need to have good organizational and system skills and excellent interpersonal relationships and the ability to supervise and motivate people.

Our programme aims to produce outstanding Health Information Administrators who want to advance the practice of Health Information to the optimum benefit of patients, hospitals and the Ministry of Health.

There is an ever increasing demand for Health Information Administrators in the health care delivery system of Kuwait to contribute as teachers, administrators and scholars.

The Computer Unit is a part of the Department of Health Information Administration. It serves the Faculty as a whole and offers specialized courses on the use of computers in the management of health care resources.
PROGRAMME REQUIREMENTS

The total number of credit hours required for graduation is 127. The programme for the B.Sc. Degree in Health Information Administration is as follows:

CLINICAL INSTRUCTORS

Mr. N. S. Akhtar, Clinical Instructor (A) (1995)
B.Com., 1991, University of Karachi, Pakistan, MBA, 2005, Sheffield Hallam University, U.K.

Ms. T. N. Al-Qurba, Clinical Instructor (A) (1997)
B.Sc., 1994, Kuwait University, M.Sc., 2004, Arabian Gulf University, Kingdom of Bahrain.

Ms. E. Khalaf, Clinical Instructor (B) (2004)
B.Sc., 1989, Kuwait University.

TECHNICAL STAFF

Mr. S. F. Habib, Technician (1994)
Medical Laboratory Sciences offers opportunities for those interested in biological and chemical sciences, leading to a career in the health service or in research. Medical laboratory scientists are professionals who perform laboratory tests and analyses that assist physicians in the diagnosis and treatment of patients. They also assist in research and the development of new laboratory tests. The various studies include chemical and physical analysis of body fluids (clinical chemistry and urinalysis), examination of blood and its component cells (haematology), isolation and identification of bacteria, fungi, viruses and parasites (clinical microbiology and parasitology), testing of blood serum for antibodies indicative of specific diseases (immunology and serology) and collection, storage of blood, pretransfusion testing and other immunohaematological procedures (blood banking). In addition, medical laboratory scientists prepare tissues for histopathological, cytological and cytogenetic examination. They must know the theory and scientific fundamentals as well as the procedures for testing. Medical laboratory scientists work in hospital clinical laboratories, medical school, research institutions, public health agencies and related organizations.

**Mission**

The mission of the Department of Medical Laboratory Sciences is to educate and train skillful, knowledgeable and committed Medical Laboratory Scientists who have breadth of knowledge and competence in the various aspects of Medical Laboratory Sciences who shall adhere to professional ethics, and who can contribute successfully as Medical Laboratory Scientists in the health care team. The Department also aims to contribute to the development of the Medical Laboratory Sciences profession and allied health services in Kuwait, both in the Kuwait health care delivery system and in private hospitals, by providing consultancy and other services.

FIRST MASTER’S PROGRAM IN THE FACULTY OF ALLIED HEALTH SCIENCES

The first Master’s Program in the Faculty of Allied Health Sciences, Kuwait University, commenced in September 2012; in the Department of Medical Laboratory Sciences. This program was developed to cater to the need of graduates of MLS as well as related areas, to go for higher studies. Needless to say that the development of the Master’s program in Medical Laboratory Sciences is the result of several years’ planning and hard work of all the staff members of the Department of Medical Laboratory Sciences.

Currently Prof. Ali Dashti is the Area Committee Chairman of the Faculty of Allied Health Sciences and Prof. Thazhumpal Chacko Mathew is the Program Director for the Master’s program in Medical Laboratory Sciences.

Four students are currently enrolled in Master’s program in Medical Laboratory Sciences and the second batch of students are already selected for the next academic year.

The most distinct feature of this program is its unique professional and practical training. The outcome of this program will certainly make a valuable contribution towards raising the standard of hospital laboratory service and the quality of health care system in Kuwait.

Prof. T. Chacko Mathew,
MLS Program Director.

Ms. Al-Shaima Al-Khalaf, Technician (2001)
B.Sc., 2000, Kuwait University.
Mr. S. Gomaa, Technician (2005)
B.Sc., 1997, Ain Shams University, Cairo, Egypt
Ms. B. Al-Zayer, Technician (2005)
B.Sc., Kuwait University
Mr. B. El Azab, Technician, (2005)
B.Sc., 1990, Cairo University, Egypt

Ms. M. A. Mansour, Technician (2007)
B.Sc., 2005, Kuwait University, Kuwait
Mr. B. Jose, Technician (2007)
B.Sc., 1999, Rajiv Gandhi University, Bangalore, India; M.Sc., 2004, Manipal Academy of Higher Education, India
Ms. A. E. Al Obaidly, Technician (2009)
B.Sc., 2006, Kuwait University
Ms. K. Hassan, Laboratory Medical Practitioner (2012)
B.Sc., 2004, Kuwait University
Ms. V. Abu Arja, Junior Technician (2005)
B.Sc., 2000, Jordan University of Science and Technology, Jordan
Ms. A. Al Mukaimi, Junior Technician (2007)
B.Sc., 2007, Kuwait University, Kuwait
Ms. M. Oomen, Junior Technician (2008)
B.Sc., 2005, Bangalore University, India; M.Sc., 2007, Bangalore University, India; M.Sc. Biotechnology, Bangalore University, India, (2007)
Mrs. M. M. Al Saho, Junior Technician (2009)
B.Sc., 2008, Kuwait University
Mrs. M. Daalah, Junior Technician (2011)
B.Sc., 2005, Creighton University, U.S.A.
The Faculty of Allied Health Sciences, Kuwait University has recently established an Occupational Therapy department which offers the first Occupational Therapy degree program in the Gulf Peninsula and the second in the Middle East.

The aim of the program is to graduate occupational therapists for the treatment, rehabilitation, and care of patients of all ages whose ability to function has been impaired. The program provides a foundation for graduates to become scholars and public educator in Occupational Therapy, wellness and health.

English is the language of teaching, learning and communication. The program is four and half years in duration and is 128 credit hours. The first year consists of basic sciences and English Language. The core occupational therapy courses and related discipline modules are taken in the second, third and fourth year. These include courses in physical dysfunction, neuroscience, orthopedics mental health, pediatrics, geriatrics, psychiatry, ergonomics and kinesiology. Students apply their academic learning in clinical settings (hospital and clinics) provided by the Ministry of Health under the supervision of qualified Occupational Therapists. Clinical education starts in the third year of program, and the final semester is devoted entirely to clinical education.

**Mission**

Our mission is to graduate skillful, knowledgeable, competent, and committed occupational therapists, who shall adhere to professional ethics and standards, and who can contribute successfully as Occupational Therapists in the health care team and meet the community health needs of the State of Kuwait in a way that is compatible with the societal values and socio-cultural constraints.

In addition, the Occupational Therapy Department is committed to contribute to the development of the Occupational Therapy profession in the State of Kuwait by providing consultation and other services and participating in local and international continuing education.

**TEACHING STAFF**

**Dr. M. S. Nadar, Assistant Professor and Acting Chairman (2006)**

**Dr. M. Z. Alnaser, Assistant Professor (2006)**
B.Sc., 1999, University of Wisconsin, Milwaukee, U.S.A., M.Sc., 2003, San Jose State University, California, U.S.A., Ph.D., 2006, Texas Women's University, Houston, U.S.A.

**Dr. N. Al Otaibi, Assistant Professor (2008)**

**Dr. F. S. Mance, Assistant Professor (2008)**
### PROGRAMME REQUIREMENTS

The total number of credit hours required for graduation is 128. The programme for the B.Sc. Degree in Occupational Therapy is as follow:

</table>
Physical Therapy is a profession which develops, coordinates and utilizes the art and science of physical therapy in planning, organizing and directing programmes for the care of individuals whose ability to function is impaired or threatened by disease or injury. Physical Therapy focuses primarily on those individuals whose potential or actual impairment is related to the neuromusculo-skeletal, pulmonary and cardiovascular systems and upon methods of evaluating, the function of these systems and the selection and application of appropriate therapeutic procedures to maintain, improve or restore function.

**Mission**

The mission of the Department of Physical Therapy is to educate, train and graduate skillful, knowledgeable and committed Physical Therapists who have breadth of knowledge and competence in the various aspects of Physical Therapy, who shall adhere to professional ethics, and who can contribute successfully and Physical Therapists in the health care team. The department also aims to contribute to the development of the Physical Therapy profession in Kuwait, both in the governmental and private sector systems, by providing consultancy and other services.
The total number of credit hours required for graduation is 122. The programme for the B.Sc. Degree is Physical Therapy is as follows:

**1 - UNIVERSITY REQUIREMENTS (19 credits)**

- 0410 - 115 Finite Mathematics: 3
- 0788 - 181 English Language: 5
- 0788 - 182 English Language: 5
- 0788 - 250 English Languageage: 3
- Elective: 3

**2 - FACULTY REQUIREMENTS (23 credits)**

Radiologic Sciences is the profession whose members have the responsibility to provide technical expertise in Diagnostic X-Ray Departments (Radiologic and Special Imaging Technologist) and Nuclear Medicine Departments (Nuclear Medicine Technologists).

The Radiologic Technologist is the professional whose role is to produce radiographs (X-Ray studies) of various body parts and systems submitting them to the radiologist for diagnostic interpretation. The curriculum includes radiation sciences, radiologic imaging, patient care, quality assurance, management and curriculum studies. Responsibilities include the manipulation of sophisticated equipment including computer reconstructed imaging. Graduates possess the skills to assume positions as radiographers and quality assurance coordinators and the experience positions as managers or instructors in radiology.

Nuclear Medicine Technology involves the use of radioactive materials for diagnostic and therapeutic purposes. The responsibilities of a Nuclear Medicine Technologists include the administration of radiopharmaceuticals administration of radioactive materials for various therapeutic purposes, and the manipulation of sophisticated equipment such as gamma cameras, computers, and various other radiation detectors.

The goal of the programme is to produce competent, skilled practitioners who can assume positions in hospitals, clinics, research laboratories, industry and government agencies. To achieve this goal students are enrolled in a course of study that includes basic biological, physical, computer and radiation sciences in addition to clinical training in the teaching hospitals and clinics.

MISSION AND OBJECTIVES

Mission

The mission of the Department of Radiologic Sciences is to train and educate skillful, knowledgeable and committed Diagnostic Radiographer and Nuclear Medicine Technologists who have breadth of knowledge and competence in Diagnostic Radiography or Nuclear Medicine Technology who shall adhere to professional ethics, and who can contribute successfully, as Technologists in the health care team.

The Department also aims to contribute to the development of the Radiologic Sciences profession and allied health services in Kuwait, both in the Kuwait health care delivery system and in private hospitals, by providing consultancy and other services.
PROGRAMME REQUIREMENTS

The total number of credit hours required for graduation is 121 in the Diagnostic Radiography track and 125 in the Nuclear Medicine Technology track. The programme for the B.Sc. Degree in Radiology Sciences is as follows:

1- UNIVERSITY REQUIREMENTS (19 credits)

0410 - 115 Finite Mathematics
0788 - 181 English Language
0788 - 182 English Language
0788 - 250 English Language Elective

2- FACULTY REQUIREMENTS (27 credits)

0490 - 101 Biology
0700 - 104 Introduction to the Professions
0420 - 110 Chemistry
0420 - 111 Chemistry Lab
0430 - 121 Physics
0430 - 125 Physics Lab
0430 - 122 Physics
0430 - 127 Physics Lab
0711 - 132 Introduction to Computers
0480 - 107 Statistics for Medical Sciences
0510 - 220 Psychology of Medical Care (AHS)
PROFESSIONAL REQUIREMENTS

Track 1: Diagnostic Radiography (75 credits)
0560 - 155 Anatomy 1
0530 - 150 Physiology 1
0714 - 202 Patient Care and Management
0714 - 203 Fundamentals of Radiologic Technology
0560 - 210 Anatomy 11
0580 - 316 Clinical Medicine and Pathology
0714 - 354 Imaging Procedures 1 and Lab.
0714 - 356 Radiologic Imaging and Processing 1 and Lab.
0714 - 357 Radiologic Imaging and Processing 11 and Lab.
0714 - 362 Imaging Procedures 11 and Lab
0714 - 364 Digital Imaging Techniques
0714 - 370 Clinical Practicum 1
0714 - 371 Clinical Practicum 11
0714 - 374 Physics of Medical Imaging 1 and Lab.
0714 - 375 Physics of Medical Imaging 11 and Lab.
0714 - 450 Special Imaging Procedures.
0714 - 453 Radiologic Pathology
0714 - 455 Imaging Procedures 111 and Lab.
0714 - 466 Computer Applications in Imaging.
0714 - 472 Clinical Practicum 111
0714 - 473 Clinical Practicum 1V
0714 - 481 Quality Assurance (DR)
0714 - 492 Research 1
0714 - 494 Research 11

Track 11: Nuclear Medicine Technology (79 credits)
0560 - 155 Anatomy 1
0530 - 150 Physiology 1
0714 - 202 Patient Care and Management
0714 - 203 Fundamentals of Radiologic Technology
0560 - 210 Anatomy 11
0580 - 316 Clinical Medicine and Pathology
0715 - 364 Digital Imaging Techniques
0420 - 114 Organic Chemistry
0712 - 117 Biochemistry
0715 - 354 Imaging Procedures 1
0715 - 362 Imaging Procedures 11
0715 - 370 Clinical Practicum 1
0715 - 371 Clinical Practicum 11
0715 - 374 Physics of Medical Imaging 1 and Lab.
0715 - 375 Physics of Medical Imaging 11 and Lab.
0715 - 450 Special Imaging Procedures.
0715 - 455 Imaging Procedures 111 and Lab.
0715 - 466 Computer Application for Imaging.
0715 - 472 Clinical Practicum 111.
0715 - 473 Clinical Practicum 1V.
0715 - 477 Radiopharmaceuticals.
0715 - 474 In Vitro Studies and Lab.
0715 - 480 Quality Assurance.
0715 - 492 Research 1.
0715 - 494 Research 11.
TEACHING STAFF

Dr. K. Al-Khalifa, Associate Professor and Acting Chairman (2001)
B.Sc., 1988, Kuwait University, M.Sc., 1995, University of Surrey, U.K., Ph.D., 2001, University of Wales, U.K.

Dr. A. Brindhaban, Associate Professor (2001)
B.Sc., University of Jaffna, Sri Lanka, Ph.D., 1993, University of Auckland, New Zealand.

Dr. G. Al Baloul, Assistant Professor (2003)
B.Sc., 1996, Kuwait University, M.Sc., 1998, University of Wales, Swansea, U.K., Ph.D., 2003, University of Wales, College of Medicine, Cardiff, U.K.

Dr. G. Al-enezi, Assistant Professor (2003)
B.Sc., 1993, Kuwait University, M.Sc., 1999, University of Wales, Swansea, U.K., Ph.D., 2003, University of Wales, Swansea, U.K.

Dr. K. A. Baron, Assistant Professor (2004)

Dr. A. J. AlbdulSalam, Assistant Professor (2004)

Dr. M. A. Dashti, Assistant Professor (2004)

Dr. R. S. A. Saeed, Assistant Professor (2004)

Dr. N. A. M. Hadi, Assistant Professor (2004)

Dr. E. Al Qattan, Assistant Professor (2004)

Dr. K. Aljazaf, Assistant Professor (2005)
B.Sc., 1993, Kuwait University, M.Sc., 1999, University of South Australia, Ph.D., 2005, Curtin University of Technology, Australia.

Dr. L. Ali, Assistant Professor (2005)
Dr. M. Abdulhusain, Assistant Professor (2006)
Marquette University, Milwaukee, U.S.A., Ph.D., 2006, University of
California, U.S.A.

Mr. G. M. Hassam, Senior Lecturer (1992)
Diploma, 1972, College of Radiographers (DCR), U.K., Postgraduate
Diploma in Physics, 1986, University of Surrey, U.K., M.Sc., 1987
University of Surrey, U.K., Diploma in Medical Ultrasound (DMU), 1990,
College of Radiographers, U.K.

Mrs. C. U. Eze, Senior Lecturer (1993)
Diploma, 1977, College of Radiographers, U.K., B.Sc., 1979, State
University of New York at Buffalo, U.S.A., M.P.H., 1981, University of
Oklahoma, U.S.A.

Dr. Y. Bakir, Senior Lecturer (2000)
B.Sc., 1975, Kuwait University, M.Sc., University of Surrey, U.K., Ph.D.,
1985, Queens Medical Centre, Nottingham, U.K.

Dr. A. Asbeutah, Senior Lecturer (2002)
B.Sc., 1986, Kuwait University, M.Sc., 1993, Kuwait University, Diploma
of Medical Ultrasound (DMU), 1999, Melbourne, Australia, Ph.D., 2006,
Monash University, Melbourne.

TEACHICIAN STAFF

Ms. C. Babu Paul, Senior Technician (1995)
B.Sc., 1978, University of Kerala, India, M.A., 1981, University
of Kerala.

Ms. A. Shukralla Technician (2003)
B.Sc., 2002, Kuwait University
B.Sc., 2009, Kuwait University.
ENGLISH LANGUAGE AND MEDICAL STUDY SKILLS UNIT

The English Language and Medical Study Skills Unit assists students in their transition from the part-time study of the English Language at the secondary school level to the full-time study of the health sciences entirely in the medium of English at the university. The programme designed to achieve this transition is a series of courses, (181, 182 and 250 English Language) each prerequisite to the next, which equip the students with the necessary language and study skills to complete the B.Sc. programmes in the Allied Health Sciences. The three courses are integrated skills courses focusing on listening, speaking, reading, writing and study skills in English. An introductory course (180 English Language) is provided for students who need additional help before they take 181 English. An English Language Placement Test will determine whether they start the programme with 180 or 181 English Language.

TEACHING STAFF

Mr. Jamal Al-Bader Al-Enezi, Director/Senior Language Instructor (1986)
B.A. English Language & Literature, 1983, Kuwait University, M.A. Translation & Linguistics, Bath University, U.K.

Ms. Patricia Blake, Senior Language Instructor (1998)

Ms. Suhare Al-Mahmoud, Associate Language Instructor (1998)

Ms. Ana Mercedes Boujarwah, Associate Language Instructor (1999)

Mr. David Roddick, Language Instructor (A) (2002)

Ms. Losana Dolo, Language Instructor (A) (2005)

Mrs. Zakara Gharibyar Alkhaldi, Language Instructor (A) (2007)

Ms. Kay Countryman, Language Instructor (A) (2007)

Ms. Renee Guilliamse, Language Instructor (B) (2011)

Ms. Nadeyah J.Al-Reiahi, Language Instructor (B) (2011)
B.A. English Education, 2006, Kuwait University, M.A. TESOL, 2010, University of Nottingham, U.K.
The newly-established department of Hearing and Speech Sciences expects to receive its first intake of students in September 2014, and will offer a Bachelor’s degree programme in Audiology.

Audiology is a clinical health-care profession devoted to hearing. Its unique mission is diagnosis and rehabilitation. Specifically, audiologists play a crucial role in early identification of hearing impairment in infants, evaluating hearing ability in people of all ages and the prevention, identification, assessment and amelioration of communication disorders that may result from hearing impairment. In addition, audiologists evaluate the need for hearing aid amplification and assess, fit and dispense hearing aids, cochlear implant program and other assistive listening devices such as FM system, loop system. Audiologists are also involved in the vestibular disorder diagnosis and rehabilitation, post-fitting rehabilitation and educational programming and facilitation.

The Bachelor’s degree in Audiology will prepare audiologists and generalists, with exposure and preparation in a wide variety of areas. Opportunities are available for audiologists in both the public and private sectors, including educational settings, rehabilitation settings and industry. Audiology Specialist, Medical Audiology, Educational, Pediatric Audiology, Dispensing/Rehabilitative Audiology, Cochlear Implant Programmers, Electrophysiology and Audiology, Vestibular Diagnosis and Rehabilitation, Audiology, and Research Audiologists.

Dr. Aseel Al Meqbel, Assistant Professor (2011)
The Student Research Poster Day started in our faculty 5 years ago. Our vision and mission acknowledges the importance of implementing the empirical research in our curriculum as an integral part of clinical and laboratory education, to enhance our educational tools, Art & Sciences, and our professional standards to better serve our clients and our Community. This objectives has been supported by all of the departments and teaching staff in this faculty.

The Student research poster day although begin as simple event it has been developed into an extraordinary annual festival and alumni of all of our current and former students, to gather and shear knowledge and experience with each other & with their teaching staff. What started as an end of the academic year celebration became now an annual scientific events with genuine research ideas and publishable abstracts.
